
1. Spectrogram in dB, noise level = median = -40.1 dB
Doppler bin
Time bin
Magnitude [dB]
2. Spectrogram in linear power $10^{S/10}$
Linear power (peak = 1)
3. Gesture bins: > noise + 15 dB (23% of bins)
4. Linear power minus noise power (0 outside gesture bins)
5. Sum over time: 99.84% inside the crop window
Cumulative share
energy per Doppler bin
crop window 140-660
cumulative share
Share of gesture energy
